

1) Measure the perimeter of each shape.

Shapes not to scale.

Perimeter = <input style="width: 90%;" type="text"/>	Perimeter = <input style="width: 90%;" type="text"/>
--	--

Shapes not to scale.

Perimeter = <input style="width: 90%;" type="text"/>	Perimeter = <input style="width: 90%;" type="text"/>
--	--

2) Measure the perimeter of each shape.

Perimeter = <input style="width: 90%;" type="text"/>	Perimeter = <input style="width: 90%;" type="text"/>	Perimeter = <input style="width: 90%;" type="text"/>
--	--	--

1) Bryn has measured the perimeter of each shape, but has made some mistakes.

- Which measurements are correct? Which are incorrect?
- If incorrect, what is the correct perimeter?

a) Perimeter = 9cm

Correct Incorrect

b) Perimeter = 12cm

Correct Incorrect

c) Perimeter = 17cm

Correct Incorrect

d) Perimeter = 18cm

Correct Incorrect

Show your working out.

Shapes not to scale.

2) Jamie is measuring the perimeter of a rectangle.

I only need to measure the two longest sides.

Do you agree? Explain your reasons.
